EXPERIENCE

Orange Egypt

Cairo, Egypt

Software Engineer – Power & Operation Team

Jan 2026 – Present

- Sole software engineer in the Power & Operation team, architecting and building an end-to-end platform for battery analysis, alarm monitoring, and testing workflows across **10,500+ telecom sites** in Egypt.
- Delivered the complete system from scratch: backend APIs with authentication, database design, cron jobs, SMTP email notifications, and operational dashboards used by the team daily.
- Identified operational bottlenecks and automated critical processes, reducing team effort and turnaround time by **40%** while the platform continues to evolve in active development.

Game Spot

Cairo, Egypt

Co-Founder & Sole Software Engineer / Architect

Jan 2026

- In parallel with my role at Orange Egypt, I co-founded Game Spot with colleagues and lead all engineering for a SaaS + mobile marketplace that lets users discover and book real-world gaming venues.
- Built and own the platform end-to-end: Expo/React Native mobile app, Next.js provider portal, and Convex backend + real-time database; integrated Paymob and cash payments with Apple Wallet passes; deployed on Cloudflare and Railway.
- Act as the sole software engineer and architect, making all technical trade-offs and scaling product capabilities for users, venue providers, and operations.

Al-Ahram Establishment

Cairo, Egypt

Software Engineer Intern

Sep 2024 – Dec 2024

- Automated data extraction from Microsoft SQL Server using Python, reducing manual reporting overhead and increasing reliability of core reporting workflows.
- Delivered a production-ready agricultural web application end-to-end, owning backend services and frontend experience; hardened security and managed on-premise deployment.

EDUCATION

Arab Academy for Science, Technology and Maritime Transport (AAST)

Cairo, Egypt

B.Sc. in Electrical and Computer Engineering **GPA: 3.3/4.00**

Oct 2020 – July 2025

PROJECTS

ToddlerWear – Kids E-Commerce Platform | Next.js, TypeScript, Convex, Cloudflare, Paymob

Jan 2026

- Delivered a production-ready, mobile-optimized e-commerce platform for kids fashion using Next.js 15 and Convex, tailored to the Egyptian market with localized currency, address formats, and payment options.
- Built an admin console for non-technical staff (products, inventory, bulk CSV, orders, role-based access) and integrated Paymob and Cloudflare (Workers, R2) with secure webhooks, HMAC validation, and email notifications via Resend.

G2scv – AI-Powered CV Builder (Co-Founder / Core Developer) | FastAPI, Flutter

July 2025 – Present

- Co-founded and led development of g2scv, an AI-powered CV builder that turns developers' GitHub, LinkedIn, and existing resumes into tailored, ATS-friendly profiles.
- Built GitHub and LinkedIn integrations feeding an AI pipeline for targeted CV generation; designed privacy-focused architecture and tiered subscription offering.

Flex Programming Language (Grade Project) | Python, Web, AI CLI, VSCode Extension

Jan 2024 – July 2025

- Conceived and delivered Flex, an AI-assisted universal programming language with multi-syntax support (English, Franco-Arabic, and C-style) to make coding accessible to Arabic-speaking beginners.
- Implemented a full Python interpreter (lexer, parser, AST evaluator), web IDE, VS Code extensions with real-time execution and integrated chatbot, and cross-platform executables.

SKILLS

Languages: C/C++, C#, Python, JavaScript, Bash, SQL, Dart

Frameworks: Flutter, Next.js, FastAPI, .NET

Developer Tools: Git, SSH, Docker, CI/CD (GitHub Actions), self hosting services

Database: Postgres, MySQL, Supabase (Postgres + Blob Storage)

LLM & Agents: Chat-based model integration, tools & function calling, agentic workflows (routing, planning, retrieval), vector embeddings with LLMs (RAG-style), LangChain, MCP-based tool integration
